*Warehouse*

25X1A

Chief, Supply Division

20 August 1953

Chief of Logistics

25X1A

Warehouse

1. During a short visit to the Warehouse on 19 August, certain observations were made which I wish to call to your attention:

25X1A

a. The new roof is completed and the space on the sixth deck, where the roof had been leaking is now clean and ready for occupancy.

b. The Otis Elevator Company is in the process of completing the installation of the new elevator. Target date has been set for 1 November.

c. Since this warehouse, at the present time, has approximately 120 thousand square feet of storage space within the building in addition to 14 thousand square feet of outdoor hard stand storage space; it occurs to me that when the elevator is completed, new cars going eastward which are now in outdoor storage and other points can well be moved into the basement or into some of the open space of this building.

25X1A

2. We have had numerous requests to take from their warehouses as much of our supplies as is possible. It appears feasible to build up at least a six-month supply for holding at the Warehouse.

25X1A

25X1A

3. Please discuss this with me.

JAMES A. GARRISON
